

Irving Shipyard

Halifax, Nova Scotia

The Irving Shipyard underwent major renovations to accommodate the building of the Arctic Offshore Patrol Ships as well as the future build of the Canadian Surface Combatant.

As part of the project, Apex:

- Supplied and installed 350 hollow metal and wood doors, including finish hardware. Frames were also supplied for all openings.
- Provided hardware prepped for electrified hardware and automatic door operators.
- Supplied and installed several 5' x 10' man doors.
- Provided turn-key installation of 13 insulated coiling doors, 9 coiling fire doors and 7 coiling aluminum counter shutters. Coiling doors were custom powder coated "Irving Blue", complete with operators.
- Supplied and installed 5 Richards-Wilcox T-300 R-25 sectional doors.

Throughout the project, Apex worked closely with the construction manager at multiple sites to ensure project deadlines were met.

This is just one of the over 88,000 projects we've completed for over 6,000 customers in the last decade.
