

Ottawa Convention/ Shaw Centre

Ottawa, Ontario

Custom stainless steel doors with etching

Architect: Ritchard Brisbin, BBB Architects Ottawa

General Contractor: PCL

These doors were a visual show-stopper.

There were 3 main banks of these doors. There were pairs of 4'x8' doors (3 pairs per bank) manufactured with stainless steel and were etched with the skyline of Ottawa on the doors. The doors were also built as sound reduction doors.

This is just one of many projects that we've done since 1966 in our Steel Door Manufacturing Group.

**How can we help you
with your next project?**
